Experience

JTP (Japan Third Party Co., Ltd.) Mar 2026 – Aug 2026
System Engineer Trainee *Remote from India*

- Owned end-to-end delivery of a containerized movie recommendation service (React, FastAPI, PostgreSQL), from requirement analysis and design documents through implementation, testing and a formal technical review with the Japan-based team.
- Designed **5 REST endpoints** (search, similar titles, preference matching, random pick) over a ∼10,000-movie catalog, with TF-IDF and cosine-similarity ranking computed per query instead of holding an ∼**800 MB** precomputed matrix in memory.
- Cut poster loading time by fetching TMDB images in parallel on a **10-worker thread pool** with caching, and shipped the stack as 3 Docker Compose services with database health checks, run with a single command.
- Followed Japanese quality practices (PDCA, Kaizen, Horenso, 5S), reporting daily and folding review feedback back into the design, code and installation, usage and technical documentation.

PwC (Salesforce Launchpad Program) Jan 2025 – Jul 2025
Software Engineering Trainee *Remote, India*

- Shipped **3 enterprise-grade applications** in a 6-month SWE program using OOP design patterns, modular code and database optimization across 4 certified tracks (Java, SQL, RDBMS, Salesforce CRM).
- Designed normalized SQL schemas across 15+ tables and tuned queries with indexing, cutting average query execution time by ∼**35%** on large enterprise data workflows.
- Delivered features across 6 Agile/Scrum sprints with sprint planning and peer code reviews, and configured 20+ Salesforce CRM automation rules and dashboards.

Altair Apr 2025 – Jun 2025
Data Science Intern · Grade: Excellent *Remote, India*

- Built ML classification and clustering pipelines in RapidMiner over 100K+ records, using cross-validation and hyperparameter tuning to reach **92% model accuracy**.
- Automated preprocessing (correlation analysis, PCA, outlier removal), trimming feature dimensionality by ∼30% and shortening experiment cycles by ∼25%.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3
AI / ML: Scikit-Learn, XGBoost, LightGBM, PyTorch, TensorFlow, SHAP, NLP, Reinforcement Learning
GenAI & Agents: LLMs, OpenAI API, Hugging Face Transformers, LangChain, RAG, Agentic AI, GitHub Copilot
Automation: Power Automate Desktop, Power Automate AI Builder, Copilot Studio, UiPath, RPA Migration
Data Science: Pandas, NumPy, PySpark, EDA, Feature Engineering, Hypothesis Testing, A/B Testing, MLflow, Drift (PSI/KS)
Web & Backend: Spring Boot, Spring Data JPA, FastAPI, React JS, REST APIs, Apache Kafka, JWT Auth, Microservices
Databases: MySQL, PostgreSQL, MongoDB, Redis, SQLAlchemy, Flyway, CTEs, Window Functions, Query Optimization
Testing & DevOps: JUnit 5, Mockito, Selenium, Playwright, pytest, Locust, Docker, CI/CD (GitHub Actions, Jenkins)
Cloud & Tools: AWS (EC2, S3, SageMaker), Kubernetes, Splunk, Linux, Git, GitHub, Vercel, Render, OpenTelemetry, Power BI
Practices: SDLC, Agile/Scrum, Kanban, Code Reviews, Secure Coding, OWASP, PDCA, Troubleshooting

Education

GITAM University, Visakhapatnam 2022 – 2026
B.Tech in Computer Science Engineering *CGPA: 7.44*
Relevant Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Machine Learning, Software Engineering

Projects

RESILIENCE | *AI Fraud-Risk Platform (ML + Full Stack)* 2026 · GitHub

- Built an end-to-end fraud-risk platform: leakage-safe temporal split, LightGBM vs. logistic regression with bootstrap confidence intervals, a cost-based approve / review / hold threshold and SHAP explanations for every score.
- Served it through a FastAPI + PostgreSQL scoring API with idempotent requests and an audit log, plus PSI/KS drift monitoring, retraining with rollback and a React + TypeScript analyst dashboard; **59 automated tests**.
- **Tech stack:** Python, LightGBM, SHAP, MLflow, FastAPI, PostgreSQL, React, TypeScript, Docker

ClaimFlow | *Event-Driven Health Claims Processing* 2026 · GitHub

- Built two Spring Boot microservices that adjudicate health-insurance claims over Apache Kafka (coverage, deductible, coinsurance, annual max), with retries, a dead-letter topic and idempotent, publish-after-commit events.
- Stored claims in MySQL (Flyway) and an audit timeline in MongoDB; covered by **32 JUnit 5** and **4 Selenium tests**, with GitHub Actions running a Docker Compose smoke test and logs shipped to Splunk.
- **Tech stack:** Java, Spring Boot, Apache Kafka, MySQL, MongoDB, JUnit 5, Selenium, Docker, Splunk

Customer Churn Intelligence | *Data Science + MLOps* 2026 · GitHub · Live Demo

- Analysed **7,043 telecom customers** in PostgreSQL, finding month-to-month fiber customers drive **72% of lost revenue**; tuned XGBoost with class weighting and 5-fold CV (**ROC-AUC 0.85, 2.9x top-decile lift**) with SHAP explanations.
- Deployed a live FastAPI + Docker service on Render that generates retention plans with the OpenAI API, with MLflow tracking, k-means segments and an A/B test design with power analysis.
- **Tech stack:** Python, SQL, XGBoost, SHAP, MLflow, FastAPI, Docker, OpenAI API, Power BI

AI Med Card | *Full-Stack Healthcare Platform* 2026 · GitHub · Live Demo

- Built Patient, Doctor and Superadmin portals on a FastAPI + PostgreSQL backend with JWT role-based auth, AI analysis of uploaded medical reports and an anonymized QR emergency card, deployed with Docker on Render.
- **Tech stack:** Python, FastAPI, PostgreSQL, JWT, pytest, Playwright, Docker, JavaScript

Certifications

- PwC — Salesforce Launchpad Program; tracks in IT Fundamentals, Java Programming, RDBMS, Salesforce CRM (2025)
- NPTEL — Data Science (IIT); Coursera — Python Data Structures (Univ. of Michigan)
- Coursera — Introduction to Cloud Computing (IBM); Mastering Generative AI Workshop — IIT Hyderabad (2024)

Achievements

- Top teams nationally at **Walmart Global Tech Hackathon 2025** (Smart Retailer Buddy), competing with 500+ teams.
- Built and demoed the KrishiBal AI farmer portal at **Smart India Hackathon 2025** (live).
- E-Club Co-Coordinator, GITAM University — led 10+ entrepreneurship events and speaker workshops, engaging 200+ students.
