Experience

JTP (Japan Third Party Co., Ltd.) Mar 2026 – Aug 2026
System Engineer Trainee *Remote from India*

- Built a ∼10,000-movie dataset with pandas by merging the TMDB 5000 and 45K-title Movies datasets: joined cast credits, cleaned vote counts, prioritized the most-voted titles and de-duplicated by TMDB ID in a reproducible build script.
- Engineered a content-based recommender combining overview, genres and top-billed cast into TF-IDF features (English stop words, **20K-term** vocabulary), ranking titles by cosine similarity computed per query instead of an **∼800 MB** precomputed matrix.
- Added preference-based ranking (genre-overlap scoring, year/rating filters, top-rated fallback) and a feedback loop toward liked genres, delivered as a FastAPI + PostgreSQL service in Docker through design docs, testing and a formal technical review.

Altair Apr 2025 – Jun 2025
Data Science Intern · Grade: Excellent *Remote, India*

- Engineered ML classification and clustering pipelines on **100K+ record** datasets using RapidMiner, achieving **92% model accuracy** through hyperparameter tuning and cross-validation.
- Reduced feature dimensionality by **∼30%** via correlation analysis, PCA and outlier removal, and experiment cycles by **∼25%**.
- Produced Matplotlib/Seaborn reports turning model results into business actions for stakeholders.

PwC (Salesforce Launchpad Program) Jan 2025 – Jul 2025
Software Engineering Trainee *Remote, India*

- Completed 4 industry-certified training tracks (Java, SQL, RDBMS, Salesforce CRM) across a 6-month SWE program, shipping **3 enterprise-grade applications** using OOP design patterns and database optimization techniques.
- Tuned SQL schemas across 15+ tables with indexing, cutting average query time by **∼35%**, and configured 20+ Salesforce CRM dashboards to surface operational KPIs across 6 Agile sprints.

Technical Skills

Languages: Python, SQL, R
Data Analysis: Pandas, NumPy, PySpark, EDA, Data Cleaning, Data Wrangling, Outlier Treatment, Feature Engineering
Statistics: Descriptive Statistics, Statistical Modeling, Hypothesis Testing, A/B Testing, Time Series Forecasting, Bootstrap CIs
ML Methods: Regression, Classification, Clustering, Ensemble Methods, ARIMA, Hyperparameter Tuning, Cross-Validation
ML Frameworks: Scikit-Learn, XGBoost, LightGBM, SHAP, TensorFlow, Keras, PyTorch, OpenCV, ONNX Runtime
DL & NLP: CNN, Transfer Learning, NLP, BERT, Hugging Face Transformers, LLMs, RAG, OpenAI API, Prompt Engineering
MLOps: MLflow, Airflow, CI/CD (GitHub Actions), Model Monitoring, Data Drift (PSI/KS), FastAPI, Docker, pytest
Visualization & BI: Power BI, Tableau, MS Excel, Matplotlib, Seaborn, Folium, React Dashboards
Databases: MySQL, PostgreSQL, MongoDB, CTEs, Window Functions, Joins, Indexing, Query Optimization, Salesforce CRM
Cloud & Tools: AWS (S3, EC2, SageMaker), Databricks, Render, Vercel, Jupyter, Google Colab, RapidMiner, Git, GitHub, Kaggle

Education

GITAM University, Visakhapatnam 2022 – 2026
B.Tech in Computer Science Engineering *CGPA: 7.44*

Relevant Coursework: Machine Learning, DBMS, Data Structures, Operating Systems, Computer Networks, Software Engineering

Projects

RESILIENCE | *Adaptive Fraud-Risk Intelligence Platform* 2026 · GitHub

- Built an end-to-end transaction fraud-risk platform: leakage-safe temporal split, features fit on training data only, and Dummy, logistic regression and LightGBM compared on validation, with the test window scored once using bootstrap confidence intervals.
- Chose the approve / review / hold threshold by misclassification cost and explained every score with SHAP, served through a FastAPI + PostgreSQL scoring API with idempotent requests and an audit log.
- Added PSI/KS data-drift monitoring with de-duplicated alerts, candidate retraining with promotion checks and rollback, and a React + TypeScript analyst dashboard, covered by **59 automated tests**.
- **Tech stack:** Python, Pandas, Scikit-Learn, LightGBM, SHAP, MLflow, FastAPI, PostgreSQL, Alembic, React, TypeScript, Docker

Customer Churn Intelligence Platform | *End-to-End Data Science + MLOps* 2026 · GitHub · Live Demo

- Built an end-to-end churn platform on **7,043 telecom customers**: a 3-table PostgreSQL schema with SQL cohort and revenue analysis, finding month-to-month fiber customers drive **72% of lost revenue**.
- Tuned XGBoost against logistic regression and LightGBM with class-imbalance weighting and 5-fold CV (**ROC-AUC 0.85, 2.9x top-decile lift**), explaining each customer's risk with SHAP.
- Ran chi-square and Welch t-tests, built 7 k-means segments (churn 2% to 57%), and designed an A/B test with power analysis.
- Deployed a live FastAPI + Docker service on Render with OpenAI retention plans, MLflow tracking and Power BI exports.
- **Tech stack:** Python, SQL, PostgreSQL, XGBoost, LightGBM, SHAP, MLflow, FastAPI, Docker, OpenAI API, Power BI

KrishiBal | *AI-Powered Farmer Portal* SIH 2025 · GitHub · Live Demo

- Trained a CNN plant-disease classifier on **54,305 PlantVillage images** across 38 classes (**99.26% test accuracy**) and served it with ONNX Runtime on Vercel, with remedy suggestions per disease.
- Built a crop recommendation model and a multilingual voice chatbot behind modular Flask services, with a PostgreSQL forum.
- **Tech stack:** Python, Flask, PyTorch, ONNX Runtime, CNNs, Scikit-Learn, PostgreSQL, JavaScript, HTML5, CSS3

Certifications

- PwC — Salesforce Launchpad Program; tracks in IT Fundamentals, Java Programming, RDBMS, Salesforce CRM (2025)
- NPTEL — Data Science (IIT); Coursera — Python Data Structures (Univ. of Michigan); Intro to Cloud Computing (IBM)
- Coursera — Office Productivity Software (HKUST); Mastering Generative AI Workshop — Tinkerer's Lab, IIT Hyderabad (2024)

Achievements

- Top teams nationally at **Walmart Global Tech Hackathon 2025** (Smart Retailer Buddy), competing with 500+ teams.
- E-Club Co-Coordinator, GITAM University — led 10+ entrepreneurship events and speaker workshops, engaging 200+ students.
