Experience

JTP (Japan Third Party Co., Ltd.) Mar 2026 – Nov 2026
System Engineer Trainee *Remote from India*

- Worked as a Systems Engineer on JTP's internal robotics projects: tested behaviour scripts for SoftBank **NAO humanoid robots**, built a **Python log-parsing tool** to isolate failing behaviours, and resolved **client-reported bugs and software issues** with written reports to the Japan team.
- Built a cleaned **∼10,000-movie** dataset in pandas by merging the TMDB 5000 and 45K-title Movies datasets: joined cast credits, cleaned vote counts, kept the most-voted titles, de-duplicated by TMDB ID and loaded it into PostgreSQL.
- Profiled field coverage and documented a known data gap (cast available for about half the catalog), so actor search returns no match instead of guessing; kept the merge as a reproducible script.
- Worked to Japanese quality standards (PDCA, Kaizen, Horenso, 5S) through requirement analysis, design documents, testing and a formal technical review, reporting daily to a Japan-based team.
- **Tech Stack:** Python, NAO robotics, Machine Learning, Pandas, Scikit-Learn, SQL, FastAPI, React, PostgreSQL, Docker, Jenkins, REST APIs, Data Validation, Git

Altair Apr 2025 – Jun 2025
Data Science Intern · Grade: Excellent *Remote, India*

- Cleaned, explored and analyzed **100K+ record** datasets in RapidMiner, segmenting records with clustering and building classifiers that reached **92% accuracy**.
- Ran correlation analysis, PCA and outlier detection to drop **∼30%** of redundant features, cutting analysis turnaround by **∼25%**.
- Turned findings into executive-ready reports and Matplotlib/Seaborn charts explaining trends and business insights to non-technical stakeholders.
- **Tech Stack:** Altair RapidMiner Studio, RapidMiner Server, Process Pipelines, CRISP-DM, Python, R, SQL, Machine Learning

PwC (Salesforce Launchpad Program) Jan 2025 – Jul 2025
Software Engineering Trainee *Remote, India*

- Designed SQL schemas across 15+ tables and tuned queries with indexing, reducing average query execution time by **∼35%** on enterprise data workflows.
- Configured **20+ Salesforce CRM dashboards** and automation rules to track business records and surface operational KPIs, across 6 Agile sprints.

Technical Skills

Languages: Python, SQL, R (dplyr, ggplot2)
Data Analysis: Pandas, NumPy, PySpark, EDA, Data Cleaning, Data Wrangling, Outlier Treatment, KPI Reporting
Visualization & BI: Power BI (DAX, Power Query), Tableau, Looker Studio, Matplotlib, Seaborn, Folium
Excel: Advanced Excel (Pivot Tables, XLOOKUP, Power Pivot, Charts), Google Sheets
Databases: MySQL, PostgreSQL, SQLite, BigQuery, CTEs, Window Functions, Joins, Indexing, Query Optimization
Data Modeling: ETL, Star Schema, Data Validation, Data Quality Checks, CRISP-DM
Statistics & ML: Hypothesis Testing, A/B Testing, Regression, Classification, Clustering, Time Series Forecasting
Business Analytics: Cohort Analysis, RFM Segmentation, Funnel Analysis, Customer Churn Analysis, Data Storytelling
Tools & Others: Jupyter Notebook, Google Colab, RapidMiner, Docker, Jenkins, Git, GitHub, AWS (S3), CRM Dashboards, Agile

Education

GITAM University, Visakhapatnam 2022 – 2026
B.Tech in Computer Science Engineering (Graduated 2026) *CGPA: 7.44*
Relevant Coursework: DBMS, Data Structures, Machine Learning, Operating Systems, Computer Networks, Software Engineering

Projects

Customer Churn Intelligence Platform | *SQL + Customer Analytics* 2026 · GitHub · Live Demo

- Modelled **7,043 telecom customers** in a 3-table PostgreSQL schema and wrote SQL cohort and revenue analysis, finding month-to-month fiber customers drive **72% of lost revenue**.
- Ran chi-square and Welch t-tests, built **7 customer segments** (churn 2% to 57%) and designed a retention A/B test with power analysis; exported KPI tables for Power BI and Excel.
- **Tech stack:** SQL, PostgreSQL, Python, Pandas, SciPy, Scikit-Learn, Power BI, MS Excel, FastAPI

Retail Sales & Customer Analytics | *SQL + Power BI Dashboard* 2026

- Cleaned and modeled retail sales data in SQL, segmenting customers with RFM analysis using CTEs and window functions, and ran a t-test to check whether discounts truly lift sales.
- Built an interactive Power BI dashboard with DAX measures for revenue, profit margin and YoY growth, with region and category drill-downs, plus an Excel pivot-table summary.
- **Tech stack:** SQL, Power BI, DAX, MS Excel, Python, Pandas, SciPy

RESILIENCE | *Fraud-Risk Analytics & Monitoring Platform* 2026 · GitHub

- Analyzed **60,000 synthetic transactions** (1.9% fraud) on a time-based split, compared models on PR-AUC rather than accuracy, and turned risk scores into approve / review / hold decisions chosen by cost.
- Built an analyst dashboard tracking scored volume, high-risk share, decision mix, risk distribution and open alerts, with SHAP showing which factors drove each transaction's score.
- Monitored data drift (PSI/KS) and data quality on incoming transactions, raising de-duplicated alerts when inputs shift away from the training data.
- **Tech stack:** Python, Pandas, SQL, PostgreSQL, Scikit-Learn, LightGBM, SHAP, FastAPI, React

Certifications

- NPTEL — Data Science (IIT); Mastering Generative AI Workshop — IIT Hyderabad (2024)
- PwC — Salesforce Launchpad Program; tracks in IT Fundamentals, Java Programming, RDBMS, Salesforce CRM (2025)
- Coursera — Python Data Structures (Univ. of Michigan); Effective Problem-Solving and Decision-Making (UC Irvine)
- Coursera — Introduction to Computers and Office Productivity Software (HKUST); Introduction to Cloud Computing (IBM)

Achievements

- Top teams nationally at **Walmart Global Tech Hackathon 2025** (Smart Retailer Buddy), competing with 500+ teams.
- Built and demoed the KrishiBal AI farmer portal at **Smart India Hackathon 2025** (live).
- E-Club Co-Coordinator, GITAM University — led 10+ entrepreneurship events and speaker workshops, engaging 200+ students.
